DevOps Engineer (m/f/d)
Canggu, Bali - Indonesia

innoscripta is a unique company and market leader for R&D compliance software solutions. We employ 300 highly motivated specialists from various backgrounds such as engineering, computer scientists and data analysts in Munich, Cologne, Vienna, Istanbul and Bali.

Our proprietary saas solution „Innovation Management System" assures efficient planning, launch and administration of R&D projects. It is specifically designed to make R&D collaboration more successful and we serve business clients with as many as 60.000 employees.

Be part of a fast growing international company, which values creativity and passion for beautiful and superior software products. You can use your skills first hand to develop services and features, which have a real impact on the sustainability and innovation of tomorrow´s world.

As a DevOps Engineer, you will be part of a cross-functional team that's responsible for the infrastructure of the internal CRM System and make it error resistant. You should be comfortable with AWS for Cloud Architecture and use of Prometheus for monitoring, as well as have experience with the ELK stack.

What you do

- Configure API Gateway for Web Applications and Microservices
- Analyze existing Infrastructure of Systems and Applications, find weaknesses, predict the load
- Make the corporate CRM System work smoothly
- Turn the corporate CRM system from a "wanna-be" high-load into a real high-load solution
- Prepare Scenarios for Deploying Services and Applications
- Pick up Project Support on AWS
- Improve existing CI/CD processes

What you have experience with

- Cloud providers (AWS)
- IaC (Terraform)
- Containers/Kubernetes
- Monitoring Infrastructure (e.g., Datadog)
- Databases (e.g. Maria DB)
- DevOps pipelines tooling (e.g. Bitbucket, Jenkins)
- GitOps

Who you are

- You have a few years of experience in a Cloud, DevOps and/ or Site Reliability Engineering position
- You have a proactive and practical approach and are passionate about developing secure, stable, and scalable infrastructures.
- You have excellent English skills, written and spoken.
- You are a great communicator, who builds collaborative relationships easily and enjoys working in a team.

What we offer:

- Freelancer contract with Germany (full-time basis).
- An exciting role with responsibility for our internally used CRM System
- Opportunity to help take our new branch to success.
- A competitive salary
